PROFILE

I am a 32 year old self-taught web developer based in Namyangju, Korea (northeast to Seoul). I love to code and have been learning it through various resources like Treehouse Techdegree, Udemy courses, Youtube channels, blog articles and many more. Until now, I have been more focused on learning frontend technic, but my skillset goes beyond that as I have passion for being a full-stack developer.

SKILLS

PROGRAMMING LANGUAGES

HTML / CSS / JavaScript

FRAMEWORKS

React / Vue / Meteor / Node / Express / Sass / MaterialUI

DATABASES

MongoDB / PostgreSQL

DESIGN TOOLS

Illustrator / Photoshop

OTHERS

REST API / AWS / Git / Github / SSH / JWT

FEATURED PROJECTS

Kwangil MES - (<http://www.kwangilmes.com>)

React / Material UI
Node / Express
PostgreSQL
AWS (S3 / EC2)

- Built to use as a tool for the plastic bag manufacturing company that I previously worked for.
- Helps manage accounts, their products and orders.
- Only administrator can generate user account and give permission to use the app as it contains the company's confidential information.

Employees Directory - (<https://kwanwooi25.github.io/techdegree-project-10>)

HTML / CSS / JavaScript
RandomUser API

- Simulates employees' directory for a fake startup company using public API (RandomUser API).
- Add, remove and search for employees.
- Display modal for detailed information of an employee.

Web App Dashboard - (<https://kwanwooi25.github.io/techdegree-project-9>)

HTML / CSS / JavaScript
Chart.js / RandomUser API

- Visualize data using Chart.js.
- Get data from public API (RandomUser API).
- Uses local storage to store settings locally.

EDUCATION

Treehouse Techdegree
2017 - 2018

Front-End Web Development
